Question 6

Not yet answered

Marked out of 1.00

🚩 Flag question

Consider a class, RecordAlbum, which has three attributes: the artist name (stored as a String), the record title (stored as a String) and the price (stored as a double). The constructor for this class takes values for the artist name, title and price respectively. Now consider the following array declaration RecordAlbum[] store = new RecordAlbum[100]; Which one of the following instructions would add the album "I love Java", by the artists "Charatan & Kans" at a price of £12.99 into the 10th position in the array?

Select one:

☐ a. store [9] = new RecordAlbum("Charatan & Kans", "I love Java", 12.99);

☐ b. RecordAlbum[10] = new store("Charatan & Kans", "I love Java", 12.99);

☐ c. store[10] = new RecordAlbum("Charatan & Kans", "I love Java", 12.99);

☒ d. store [9] = ("Charatan & Kans", "I love Java", 12.99).

☐ e. store[11] = new RecordAlbum("Charatan & Kans", "I love Java", 12.99);
