

```
public String whatObjectAmI()
{
    return "I am a class D object";
}
public String welcome()
{
    return "I am a class C object";
}
public int welcome(int y)
{
    int x = 2 * y;
    return x;
}
}
```

☐ d. `public class Class_B extends Class_A`

```
{
    public void welcome(String str)
    {
    }
}
```
