

that you are assigned to design a dormitory management database. A dormitory is located on some building and has attributes specified as DormID (primary key) and DormID is a primary key. Based on university's rule, six students can be assigned to one dorm. Students can be tracked with attributes (STUDENT table, Department) and IdNo is primary key. Based on this scenario description, which of the following SQL statement is correct to establish relationship between DORM and STUDENT assuming DormID is foreign key?

STUDENT table is a referenced relation

FOREIGN KEY (DorID) REFERENCED BY DORM(DormID) )

DORM table is a referencing relation

FOREIGN KEY (DorID) REFERENCES DORM(DormID) )
