***LEADRESHIP AND CHANGE MANAGEMENT***

LECTURE POWER POINT FOR EXIT EXAM TRAINING

BY

***ATNAFU ASHENAFI (MA)***

March, 2015

Dilla

## 1.1. What is Leadership?

- *Definitions of leadership*

- “Leadership is the ability to persuade others to seek defined objectives enthusiastically. (*Keith Davis*)
- It is the human factor that binds a group together and motivates it toward goals.
- The process by which one individual influences others to accomplish desired goals without coercive types of influence. (Gibson, Ivancevich and Donnelly)

# Cont.....,

- ❖ “Leadership may be defined as a process of influencing the action of individuals as members of a group to achieve the desired goal.(Gupta)
- ❖ The ability to influence a group toward the achievement of goals.(Robbins)
- ❖ “leadership is fundamentally the ability to form and mold the attitudes and behaviour of other individuals.(Hodge and Johnson)

# Cont.....,

- **leadership** is a process of influencing other people to mobilizes and direct their efforts towards certain goals.
- The relationship between two or more people in which one attempts to influence the other toward the accomplishment of some goal.(Ivancevich, Szilagyi and Wallace)
- **Leadership** is the exercise of influence by one member of a group or organization

# Cont.....,

- **Leadership** is formally defined as the process of influencing others to behave in preferred ways to accomplish organizational objectives
- **Leadership** is the *incremental influence* one individual exerts over another
- **Leadership** is an influence relationship among leaders and followers
- **Leadership** occurs when one individual influences others to do something voluntarily.

# Best description of leadership

- **First**, leadership involves exerting influence over other members of a group or organization.
- **Second**, leadership involves helping a group or organization achieve its goals.

# Cont.....,

- ❖ Leadership is the combination of characteristics or personality traits in an individual.
- ❖ leaders have a clear mental picture of
  - I. where the organization is;*
  - II. where the organization needs to go; and*
  - III. how the organization is going to get there.*
- ❖ Leaders present a clear path for followers to take to accomplish a task or goal.
- ❖ They get followers to work together to complete the tasks.

# Leadership Vs. Management

| Management                                  | Leadership                                      |
|---------------------------------------------|-------------------------------------------------|
| Engages in day-to-day activities:           | Formulates long-term objectives                 |
| Exhibits supervisory behaviour:             | Exhibits leading behaviour                      |
| Administers subsystems within organizations | Innovates for the entire organization           |
| Asks how and when                           | Asks what and why                               |
| Acts within established culture of the Orgn | Creates vision and meaning for the organization |
| Relies on control strategies                | Uses empowering strategies                      |
| Status quo supporter and stabilizer         | Status quo challenger and change creator        |
| Success based on predictability             | Success based on innovation and adaptation      |
| Does things right                           | Does the right things                           |
| Top-down strategy                           | Leadership at all levels; everyone strategic    |
| Measurement of activities                   | Measurement of results                          |

# What makes effective leader?

- Good group leaders make an effort to learn and practice skills.
- listen to others openly.
- offer and accept constructive suggestions.
- give clear directions.
- help member's identity and solve problems.

# Cont.....,

- Know your job
- Be Sensitive
- Be Firm. Stand up for what you believe is right
- Ability to **Inspire** others
- Problem solving skill
- Ability to understand human behaviour
- **Willingness** to take risk

# Effective leaders are characterized by the followings

- ▶ They are honest:
- ▶ Effective leaders want do what they will do.
- ▶ They keep their promises and follow through on their commitment.
- ▶ Consistent
- ▶ They admit to their mistakes.
- ▶ They create trusting and open climate
- ▶ The help others successful and feel empowered
- ▶ They don't push too much
- ▶ They encourage members to do more.
- ▶ They avoid phrases that cause resentment, reluctance and resistance

# LEADERSHIP THEORIES AND STYLES

## 1) The Great Man theory of Leadership

- These leaders are cited as naturally great leaders.
- Born with a set of personal qualities that made them effective leaders.
- Leaders are born and not made.
- possess certain traits which were inherited.
- leadership was considered as a quality associated mostly with the males.
- states that some people born with the necessary attributes that set them apart from others.
- Eg. Alexander the great, Julius Caesar, Napoleon, Queen Elizabeth I, and Abraham Lincoln,

# The Trait Theory of Leadership

- Similar in some ways to Great Man theories, trait theories assume that people inherit certain qualities and traits.
- trait theory concentrates on “**what the leaders’ are**”,
- *Physiological* (appearance, height, and weight),
- *Demographic* (age, education and socioeconomic background), *personality*, (self-confidence, and aggressiveness,)
- *Intellective* (intelligence, decisiveness, judgment, and knowledge),
- *Task-related* (achievement drive, initiative, and persistence)

# Behavioral Leadership Theory

- ❖ behavioral theories assume that specific behavioral patterns of leaders can be acquired through **learning and experience**.
- ❖ The behavioural theories concentrate on “**what the leaders’ do**”.
- ❖ This leadership theory focuses on the **actions of leaders**, not on mental qualities or internal states,.
- ❖ Theory considers effective leadership to be the result of many learned or acquired skills.
- ❖ It proposes that an individual can learn to become a good leader.

# (1) Ohio State Studies

- Theories was the study made by Ohio State University in 1945.

## (i) Initiating Structure:

- A leader with initiating structure is generally task oriented, with focus on performance of employees.
- which a leader is likely to define and structure his or her role and those of employees.

## (ii) Consideration

- Concern for followers' comfort, well-being, status, and satisfaction.
- A leader is likely to have a good relationship, with his or her followers.

2)

# The Michigan Studies

- leadership behaviour that they labelled *employee-oriented* and *production-oriented*.

## a) **Employee-oriented leaders**

- Emphasize interpersonal relations.

## b) **Production-oriented leaders**

- Emphasize the technical or task aspects of the job.
- Mainly concerned with making sure the group accomplishes its tasks.

# Contingency Leadership Theory:

- Theories that propose that leadership effectiveness depends on the **situation**.
- This theory views leadership in terms of a dynamic interaction between a number of situational variables like **the leader, the followers, the task situation, the environment, etc.**
- The fundamental principle of the situational theory is that **there is no single "best" style of leadership.**

- Fiedler created the *least preferred co-worker (LPC) questionnaire*.
- **LPC** is used to determine whether individuals were mainly interested in *good personal relations* with co-workers, and thus relationship-oriented, or mainly interested in *productivity*, and thus task-oriented.
- if a situation requires a task-oriented leader and the person in that leadership position is relationship oriented, either the situation has to be modified or the leader must be removed and replaced.

## 2) Hersey and Blanchard's Situational Leadership Theory

- The focus of this theory is laid on the followers **readiness** in accepting a leadership.
- It is the followers who **accept or reject** a leader.
- Effectiveness of leadership depends upon the actions of the followers.
- SLT says that if a follower is **unable and unwilling** to do a task, the leader needs to **give clear and specific directions**.

## Cont.....,

- If a follower is **unable and willing**, the leader needs to display **high task orientation**(sell” the task).
- If the follower is **able and unwilling**, the leader needs to adopt a **supportive and participative style**.
- If the employee is both **able and willing**, the leader does not need to do much (in other words, a **laissez-faire approach** will work).

### 3)

## Path-Goal Theory

- **Path-Goal Theory** was developed by Martin Evans and Robert House in 1970-71.
- *Clarify the path* to help their followers to *move forward from their current position* towards achieving the work goals.
- The leader *reduces the roadblock* that occurs in the path of the followers, and makes their *journey easier*.
- This theory identifies **four** types of leadership.
  - *The directive leader*
  - *The supportive leader.*
  - *The participative leader.*
  - *The achievement-oriented leader*

## 2. Contemporary theory of Leadership

- Today, leadership theories also try to explain how certain leaders can *achieve extraordinary levels of performance from their followers*.

### I. Transactional leaders:

- Leaders who *guide or motivate their followers* in the direction of established goals by clarifying role and task requirements.

- I. Workers are motivated by rewards and punishments
- II. People perform their best
- III. Obeying the instructions and commands of the leader
- IV. Subordinates need to be carefully monitored

## II. Transformational leaders

- leaders inspire followers to transcend their own self-interests for the good of the organization.
- Inspire followers to give a new outlook for the old problems.
- Transformational leaders pay attention to the developmental needs and concerns of the followers.
- Transformational leaders are able to excite, arouse, and inspire followers to exert extra effort

# III. Charismatic leadership

- A leader who uses his or her communication skills, persuasiveness, and charm to influence others.
  - *Strong communicator*
  - *Empathetic and relatable*
  - *Confident*
  - *Motivational*
  - *Engaging and charming*
  - *Optimistic*

# Leadership skills and competencies

❑ skill as “an acquired talent that a person develops related to a specific task”

## 1) Technical Skill.

- ✓ Refers to a person's knowledge and ability in any type of process or technique.
- ✓ Concerns with things or works
- ✓ Used for lowest manager

## 2) Human Skill.

- ✓ It is the ability to work effectively with people and to build teamwork.
- ✓ It is the major part of the leadership behaviour.
- ✓ Concerns *people*.
- ✓ Used for the three level managers

### 3) Conceptual Skill.

- This is the ability of the leader to think in terms of models, framework and broad relationships.
- Seeing the organization in its **total picture**
- Observing the **whole picture** for the organization.
- Conceptual skill deals with *ideas*.

## II. Leadership Competencies

- *Competence* is the ability of an individual to perform a task using his/her *knowledge, education, skills, and experience*.

### ❖ Good Versus Bad Leaders

- ❖ good leaders are early, greet you, and respect.
- ❖ good leaders talk you up.
- ❖ good leaders put themselves last and the mission and the team first.
- ❖ good leaders develop other good leaders.
- ❖ good leaders communicate their thoughts.
- ❖ *Listening*
- ❖ *Coaching*
- ❖ *Trusting*
- ❖ *Not giving orders*
- ❖ *Providing direction*

# Bad Leaders

- Bad leaders set appointments and are late for them.
- Bad leaders talk down to you.
- Bad leaders develop themselves.
  - *Dishing out orders.*
  - *Failing to listen.*
  - *Exhibiting the “Do as I say, not as I do”*
  - *Providing inadequate support*
  - *Withholding information*
  - *Being afraid to discipline*

# Leadership style

## I. Authoritarian leaders

- ✓ known as authoritarian leadership.
- ✓ Characterized by individual control over all decisions.
- ✓ Autocratic leaders typically make choices based on their own ideas and judgments.
- ✓ Rarely accept advice from followers.
- ✓ Leaders make the decisions
- ✓ Little or no input from group members
- ✓ Does not consult staff.
- ✓ Rely on threats and punishment to influence staff
- ✓ Impose order & restriction

## 2) Democratic Leadership Style

- **known as participative leadership.**
- **Members of the group take a more participative role in the decision-making process.**
- **The most effective and lead to higher productivity.**
- **better contributions from group members.**
- **Group members are encouraged to share ideas and opinions.**
- **Creativity is encouraged and rewarded.**
- **Produce high quality and high quantity work.**
- **cooperation, team spirit, and high morale**
- **Friendliness.**

# III. Laissez-Faire Leadership Style

- known as delegative leadership.
- Also known as the “hands-off” style
- leaders offer little or no guidance to group members.
- leave decision-making up to group members.
- Effective in situations where group members are highly qualified in an area of expertise.
- Complete freedom for followers to make decisions.
- The manager provides little or no direction.
- All authority or power given to the staff.

# AN OVERVIEW OF ORGANIZATIONAL CHANGE MANAGEMENT

## ❖ Meaning and implications

- Alteration in the existing conditions of an organization.
- It is the act, process, or result of making or becoming different.
- It is something that is different from what is usual
- A transition from a current state to a future one, a different phenomenon.
- Change management can be defined as the process of managing changes.
- An effective management of new methods and systems in an on-going organization.

# Cont.....,

- Refers to the making of changes in a planned and managed or systematic fashion.
- *Change management* is a method for reducing and managing resistance to change when implementing process.
- *The aim* is to more effectively implement new methods and systems in an ongoing organization.
- The changes to be managed lie within and are controlled by the organization.

# Forces of Organizational Change

- Forces of change can be classified in two categories namely:
  1. *External forces*
  2. *Internal forces*.

## 1) External Forces

*i. Socio-cultural forces* –include norms like education, population, literacy, traditions, customs, rate of urbanization, leisure etc.

*ii. Economic forces* –economic condition of the country, market condition, demand for the product, competition, price determination, buying capacity of the customer, cost and benefit position, distribution of income.

# Cont.....,

- iii. Political and legal forces* – forces include political system, ideology of ruling and major opposition party, political stability, and various legislations for business.
- iv. Technological forces* – may bring major changes in organization.
  - include new techniques of production, procedure, innovative ideas of production process and in product, research and development, transfer of technology.
- v. Work environment forces* – forces include customer's loyalty, suppliers' regularity, community attitude and recognition by society

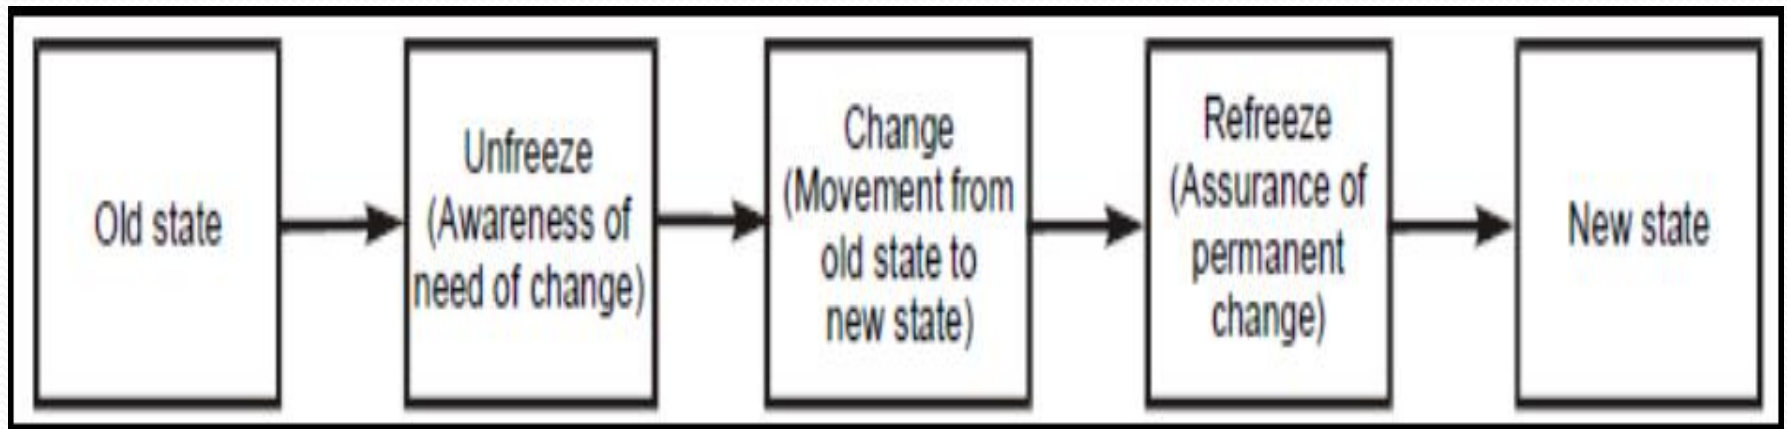

## 2. Internal Forces:

❖ *The internal forces include the following:*

- i. Top management, its philosophy and corporate policy.
- ii. Promotion, resignation and transfer.
- iii. Changes in the perception, attitude, feeling, beliefs and expectations of employees of the organization.
- iv. Change in work schedule, allocation of duties, job contents, duty hours and composition of work group etc.
- v. Change in internal environment of the organization.

# Process of organizational change

- One strategy of change is through the *adoption of a system approach*.

## 1. unfreezing

- Is the managerial responsibility of preparing a situation for change.
- Sometimes called the *boiled frog phenomenon*.

## 2. Changing

- The **changing** stage involves taking action to modify a situation by changing things, such as the people, tasks, structure, or technology of the organization.
- Change can affect all aspects of the operation and functioning of the organization.

## 3. Refreezing

- The **final stage** in the planned change process is **refreezing**.
- It involves **evaluating** progress and results, and
- Assessing the costs and benefits of the change.
- It allows for modifications to be made in the change to increase its success over time

# Resistance to Change

- **What Is Resistance to Change?**

- Is the reluctance to adapt to change when it is presented.
- Is the act of opposing or struggling with modifications or transformations that alter the status quo.
- It can manifest itself in one employee, or in the workplace as a whole.
- Is the unwillingness to adapt to altered circumstances.
- It can be covert or overt, organized, or individual.
- Employees can also feel uncomfortable with the changes introduced and resist.

# The Most Common Resistance to Organizational Change

1. **Fear of the Unknown:**
2. **Fear of Failure**
3. **Economic Factors**
4. **Insecurity:**
5. **Lack of Communication:**
6. **Extent of Change:**
7. **Psychological Factors:**
8. **Social Factors:**

# What are the Effects of Resistance to Change?

- Low morale of employees:
- Lack of order in the work environment
- Decreased efficiency:

## ❖ Managing Resistance to Change

### ***a. Education and communication.***

Resistance can be reduced through communicating with employees to help them see the logic of a change.

### ***b. Participation and involvement***

- This consists of the active involvement of everybody involved in the change.
- Their involvement can reduce resistance.

## Cont.....,

### *3. Facilitation and support.*

- providing positive support for people in new situations such as employee counselling and new-skills training.

### *4. Negotiation and agreement*

### *5. Manipulation and co-optation*

### *6. Explicit and implicit coercion*

# CHAPTER FOUR

## TYPES OF CHANGE

### ❑ Planned and Unplanned Change

#### 1. Unplanned Change

- Are spontaneous, accidental or the product of sudden decision.
- A necessary action following unexpected events.
- Is influenced by external factors outside of the organization's control.
- The change resulting from natural calamities like flood; drought, famines, volcanic eruption, etc
- Occurs because of a major, sudden surprise to the organization

## II. Planned Change

- Is the process of preparing the entire organization, or a for new goals or a new direction.
- This direction can refer to culture, internal structures, processes, metrics and rewards.
- occurs when leaders in the organization recognize the need for a major change
- proactively organize a plan to accomplish the change.
- occurs when deliberate decisions are made in an organization.
- emanates from within the company.
- /Eg. Introduction of new products and technologies, organizational restructuring, team building,

# Revolutionary and Evolutionary change

- Organizational change can occur quickly or slowly.

## I. Evolutionary Change

- Is gradual and incremental.
- Slow, gradual change often takes place to ensure the survival of the organization.
- It happens step by step, little by little.

## II. Revolutionary Change

- Is immediate, dramatic, and forced down.

# *The 3 Types of Organizational Change*

## *1. Developmental Change:*

- Improves upon something that is already being done, rather than creating something new.
- It can involve improving office communications or changes to improve sales

## *2. Transitional Change:*

- ❖ Is a change that is replacing the “old way” something is done with a completely “new way” of doing things.
- ❖ It involves already knowing the desired future state and the need to change people and culture to adopt the new processes/procedures.

## • Cont.....,

### 3. Transformational Change:

- This type of organizational change differs from transitional in that **it's much more challenging** because the future state is unknown when the change project is begun.
- This type of a more radical change would be to adjust to a global pandemic or large.

# CHAPTER- 5

## CONFLICTS AND CONFLICT MANAGEMENT

### ❖ The concept of conflict

- Conflict is part of daily life, normal, essential and unavoidable human phenomenon (Dogan, 2016).
- Where there is human interaction; there is a likelihood of agreements and disagreements.
- These agreements and disagreements among individuals and groups lead to conflicts.
- Is a disagreement with regard to interests or ideas.
- There is disagreement, opposition, incompatibility and cross-purposes among individuals in conflicting cases”(Rowden, 2000).

# Cont.....,

- Conflict may arise when wants, needs and beliefs between two or more parties struggle to agree.
- **Conflict** can therefore be said disagreement between two or more opposing parties with differing needs, ideas, beliefs, values and goals.

## ❖ The Stages of Conflict

1. **Latent Conflict**-people may be in conflict without being aware that they are in conflict.
2. **Perceived Conflict**-is when the people involved in a conflict become fully aware that there is a conflict.
3. **Felt Conflict**: -Feelings or attitudes and perceptions may create conflict . stress and anxiety are felt by one or more of the participants due to the conflict.

# Cont.....,

**4. Manifest Conflict**-is the overt phase of conflict when aspects of the situation can easily be measured.

- Can take a number of shapes including: e-mails, phone calls, phone messages, face-to-face meetings.

**5. Conflict Outcome:-** centres on the resolution of conflict  
The outcome can be either positive or negative .

## Types of Conflicts

- There are four types of conflicts .

### a) Intra-Personal Conflict

- It is conflicts with-in the individual.
- Conflict with-in him/ her.

# Cont.....,

## b) Inter-Personal Conflict

- are conflicts that arise between individuals.

## c) Intra-Group Conflict

- Conflicts made b/n in small groups.

## d) Inter-Group Conflict

- Refers to the disagreement or differences between two or more units or groups (departments) in an organization.
- ❖ Conflict is not always destructive; it may be a motivator.
- ❖ When it is destructive however, managers need to understand and do something to deal with it.

# Outcomes of Conflict

## *I. Positive Effects /outcomes of Conflict*

- Conflict is not always bad for an organization or for an individual.

*Conflict is often needed. It:*

- (1). Helps to raise and address problems,*
- (2). Energizes work to be on the most appropriate issues,*
- (3). Helps people “be real” it motivate them to participate and*
- (4) Helps people learn how to recognize and benefit from their differences.*

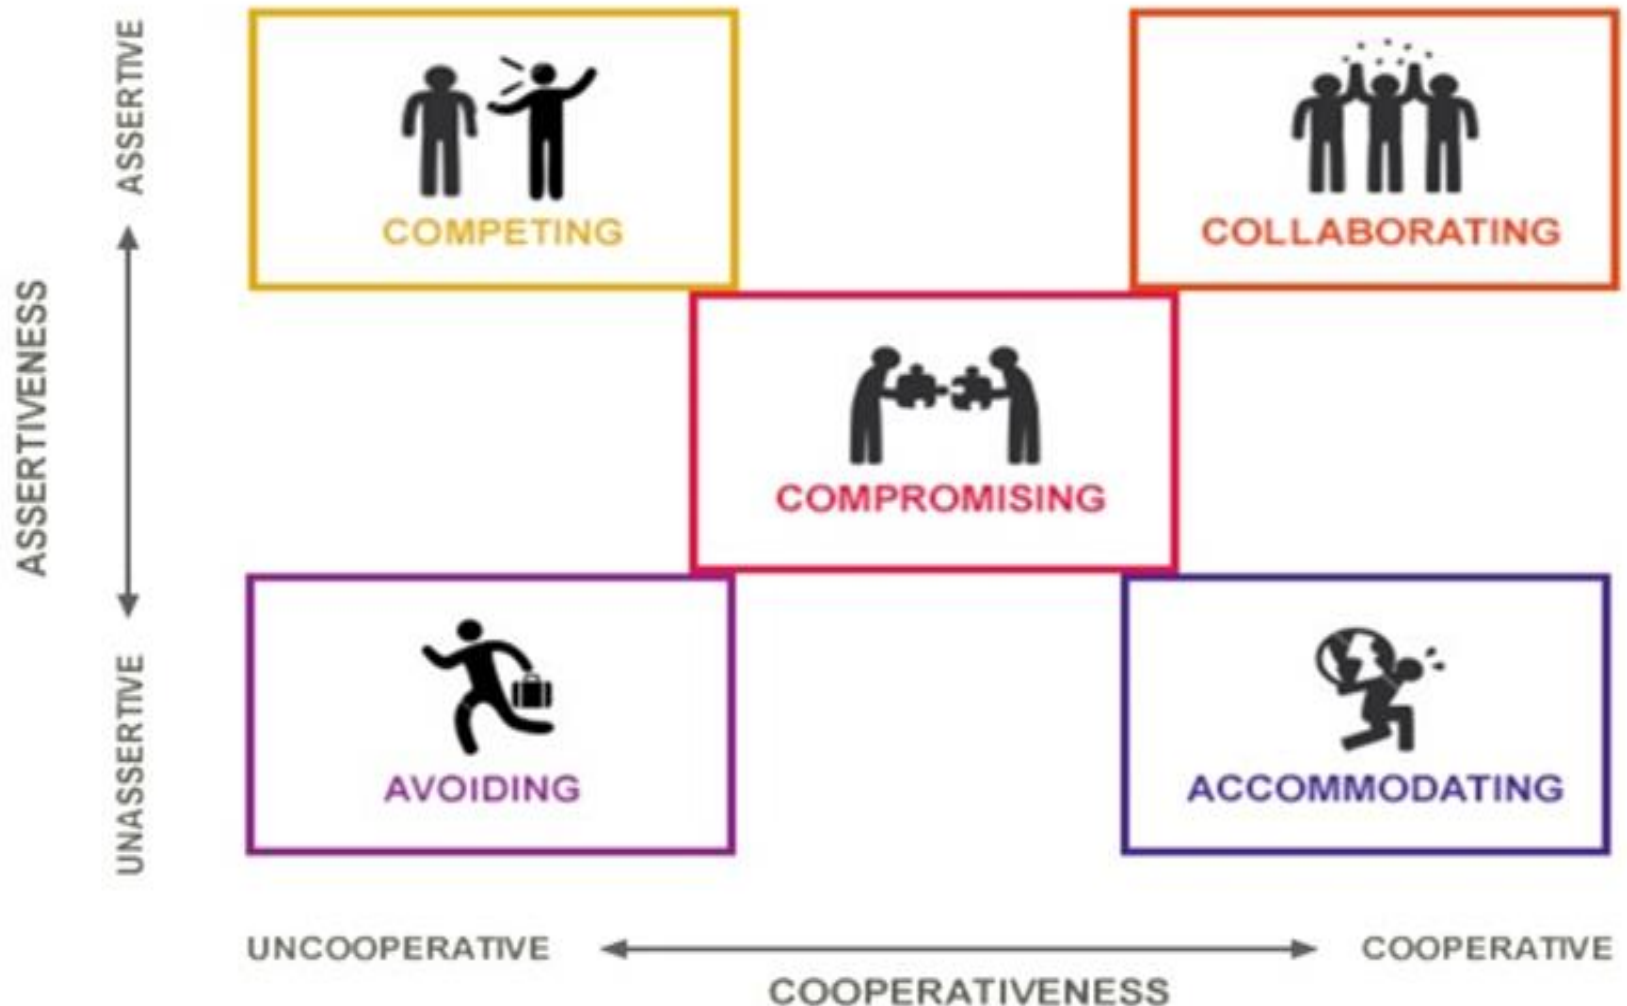

# Cont.....,

- Stimulate creativity, encourage flexibility, increase problem awareness, increased group cohesiveness, increase motivation to improve, improve quality of decision made, increase productivity, improve quality to work, increase loyalty, increase acceptance of autocratic leader, increase emphasis on task accomplishment, decrease tension, more appropriate adjustment of tasks and resources and etc.

# Negative Effects/Outcomes of Conflict

- Causes feelings of anxiety, guilt, frustration, distorted perception, decreased communication, lack of trust, decreased cooperation, decreased cohesion and productivity.
- Delay decisions, decrease or destroy sensitivity, cause members to drop out or resign from committees, arouse anger that disrupts a meeting, provoke personal abuse and cause defensiveness.

# Conflict Management mechanisms

## ● Cont.....,

- Five conflict management styles based on two dimensions: *assertiveness and cooperativeness*.
- Assertiveness is the motivation to achieve *individual goals, objectives, and outcomes*, while
- cooperativeness assesses the desire *to help the other* party to achieve its goals or outcomes.

### **1/Avoiding Style.**

- It is also known as withdrawing style.
- In this style assertiveness and cooperativeness are low.
- People who fear conflict use the avoiding style to escape from conflict situations. .
- This style is appropriate to use in the situation where there is no chance of winning or when disruption would be very costly

## 2/ Competing Style or Forcing style.

- This style is also known as the “win-lose” approach.
- High assertiveness and low cooperativeness.
- This approach may be appropriate when quick actions are needed for example during emergencies.
- This style is inappropriate in an open and participative climate.

## 3/ Accommodating Style or Obliging.

- It is also called Smoothing style.
- This style has a high degree of cooperativeness.
- A manager using this style tries to get his/her own goals, objectives, and desired outcomes to allow partners to achieve their goals and outcomes

## 4/ Compromising Style.

- can be determined as a “*give-and-take*” approach with **moderate levels** of both assertiveness and cooperativeness.
- This approach can be applied when the goals and the power of both sides are of equal importance.
- when it is necessary to find a temporary, timely solution.

## 5/ Collaborating Style.

- Characterized by high levels of assertiveness and cooperativeness.
- described as the “*win-win*” scenario

# Cont.....,

- Both sides creatively work together to achieve the goals and desired outcomes .
- It may take a lot of time to reach a consensus

## ❖ Sources of conflict

- Resource scarcity
- Incompatible goals
- Structural factors (size, specialization, reward systems)
- Conflicting perceptions, ideas, or beliefs
- Differences between people
- Conflicting thoughts/needs within an individual
- Lack of communication (maybe)

# Causes of Organizational Conflict

- **Managerial Expectations:** Every employee is expected to meet the targets, imposed by his/her superior and when these expectations are misunderstood or not fulfilled within the stipulated time, conflicts arises.
- **Communication Disruption:** One of the major causes of conflict at the workplace is disruption in the communication.
- **Misunderstanding:** Misunderstanding of information, can also alleviate dispute in organization, in the sense that if one person misinterpret some information, it can lead to series of conflicts.

## Cont.....,

- **Lack of accountability:** If in a project, responsibilities are not clear and some mistake has arisen, of which no member of the team wants to take responsibility can also become a cause of conflict in the organization.

### Conflict resolution is only a five-step process:

*Step 1: Identify the source of the conflict.*

*Step 2: Look beyond the incident.*

*Step 3: Request solutions.*

*Step 4: Identify solutions both disputants can support.*

*Step 5: Agreement.*

THE END!

*THANK YOU  
FOR YOUR  
ATTENTION!*
