

Processes by which trees contribute to soil physical, chemical and biological activity includes all except_____.

- ☐ a. Increases availability of phosphorus through mycorrhizal associations.
- ☐ b. Increases of extremes of soil temperature by shade and litter.
- ☐ c. Reduction of acidity
- ☐ d. Improvement in the activity of soil fauna

Which one of the following does not more related with global water resource challenges of this century?

- ☐ a. Cultural diversity
- ☐ b. Meeting basic needs
- ☐ c. Protecting ecosystems
- ☐ d. Securing the food supply

Which one of the following issues is not necessarily to be considered to generate energy from wind?

- ☐ a. Duration of sun shine
- ☐ b. Dominant wind direction
- ☐ c. Average wind speed for considerable period
- ☐ d. Space

The natural process by which plant replace or reestablish themselves known as_____.

- ☐ a. Natural preservation
- ☐ b. Natural protection
- ☐ c. Natural regeneration
- ☐ d. Natural management

Which one of the following could not be considered as application of rain water harvesting?

- ☐ a. Agriculture water uses
- ☐ b. Navigation water uses
- ☐ c. Cultural water uses
- ☐ d. Domestic water uses

Identify which of the following terms wrongly describes "invasive species".

- ☐ a. Native species of the ecosystem
- ☐ b. It could be animal species
- ☐ c. It could be plant species
- ☐ d. It could be organisms

_____ is an attribute of land that can be measured or estimated.

- ☐ a. Multiple land utilization type
- ☐ b. Land quality
- ☐ c. A compound land utilization type
- ☐ d. Land characteristic

If the light penetration of a given water body is getting higher, which of the following phrase describes the characteristics in the water body?

- ☐ a. High dissolved oxygen
- ☐ b. High turbidity
- ☐ c. Reddish color of water
- ☐ d. Unsuitable for aquatic life

Question 13

[Flag question](#)

In agronomic classification agrosilvopastoral used to denote the combination of_____.

- ☐ a. Animals and trees
- ☐ b. Pasture and trees
- ☐ c. Trees and crops
- ☐ d. Crops, animals/pasture, and trees

Factors affecting the adoption of integrated soil fertility management (ISFM) technologies except _____.

- ☐ a. Capital investment and economics
- ☐ b. The adaptability of ISFM to a certain environment
- ☐ c. Land utilization type
- ☐ d. Gender and social-economic issues

Major economic factors to be considered in nursery site selection are_____.

- ☐ a. Water
- ☐ b. Accessibility and facilities
- ☐ c. Topography
- ☐ d. Climate

_____ is the practice of using trees and/or tree planting specifically to pursue social objectives, usually betterment of the poor.

- ☐ a. Community forestry
- ☐ b. Social forestry
- ☐ c. Farm forestry
- ☐ d. Private forestry

Question 19

[Flag question](#)

Which of the following does not indicate the major process of soil erosion

- ☐ a. Detachment
- ☐ b. Deposition
- ☐ c. Transport
- ☐ d. Percolation

Which one of the following is not considered as evidences for environmental impacts of energy production and utilization?

- ☐ a. Un-employability
- ☐ b. Global warming
- ☐ c. Rise in the sea level
- ☐ d. Ozone depletion

Question 21

Not yet answered

Marked out of 1.00

[Flag question](#)

Identify the false statement about Geo-politics of water resource development.

- ☐ a. The conflict arises when all basin states accept the international law of trans-boundary water recourse use and management.
- ☐ b. Trans-boundary water conflict can be seen through verbal action between basin states.
- ☐ c. Trans-boundary water conflict can be leads to militarily hostile actions.
- ☐ d. The power relations between basin states determine the negotiation processes of water resources management.

Flag question

Symbiotic association of fungi with vascular plants usually lives in ____.

- ☐ a. Shoot of the plant
- ☐ b. Grain of the plant
- ☐ c. Leaves of the plant
- ☐ d. Roots of the plant

Question 52

Not yet answered
Marked out of 1.00

Flag question

Which of the following does not describe the concept of sustainable forest management?

- ☐ a. It should follow mathematically-based computer model.
- ☐ b. All types of forests should develop for the benefit of present and future generations.
- ☐ c. Its management should follow according to the principles of sustainable development.
- ☐ d. All types of forests should keep the balance between ecological, economic and socio-cultural.

Question 53

Not yet answered
Marked out of 1.00

Flag question

Identify the CORRECT statement from the given alternatives.

- ☐ a. Land evaluation may be concerned with present land performance
- ☐ b. Land evaluation is only part of the process of land use planning
- ☐ c. Land suitability is assessed and classified with respect to specified kinds of use.
- ☐ d. Land evaluation is concerned with the assessment of land performance when used for specified purposes.

Question 54
