

Model Exit Exam for Management Students, 2023

Multiple Choice Questions

1. Which of the following is **false** about the nature of Organization Behavior? OB is:
 - A. A Humanistic and Pessimistic Approach.
 - B. An Applied Science.
 - C. A Normative Science.
 - D. A separate field of study and not a discipline only.
 - E. None of the above
2. Which one of the following **is not** a dependent variable?
 - A. Job satisfaction
 - C. Tenure
 - B. OCB
 - D. Turn over
 - E. All of the above
3. _____ is the difference between the amount of rewards workers receive and the amount they believe they should receive.
 - A. Job satisfaction
 - C. Tenure
 - B. OCB
 - D. Turn over
 - E. All of the above
4. A school of thought in the study of OB which argues that there is no single best way to manage behavior is referred to as:
 - A. Scientific management
 - C. Hawthorne studies
 - B. Bureaucratic approach
 - D. Contingency approach
 - E. None of the above
5. Which of the following best describes bureaucratic approach to Organization Behavior?
 - A. There is no single way to manage behavior
 - B. The human element in the work place was considered more important
 - C. It makes the historical roots for the field of Organization Behavior
 - D. Assumes that one structure would work for all organizations
 - E. Assumes that employees are motivated largely by money.
6. Which of the following is false about the relationship between seniority and productivity?
 - A. There is a positive relationship between tenure and job productivity.
 - B. There is a negative relationship between tenure to absence.
 - C. Tenure has consistently been found to be negatively related to turnover and has been suggested as one of the single best predictors of turnover.
 - D. Tenure and satisfaction are positively related
 - E. None of the above
7. One of the dimensions of intellectual ability that refers to the ability to identify visual similarities and differences quickly and accurately is:
 - A. Verbal comprehension
 - C. Perception
 - B. Memory
 - D. Number aptitude
 - E. None of the above
8. The ability to continue maximum effort requiring prolonged effort over time is known as:
 - A. Balance
 - B. Stamina
 - C. Static strength
 - D. Body coordination
 - E. None
9. All of the following are true about the relationship between job satisfaction and job performance except:
 - A. Job satisfaction and customer satisfaction have positive relationship
 - B. Job satisfaction and OCB have negative relationship
 - C. Job satisfaction and workplace deviance have inverse relationship
 - D. Job satisfaction and organization's effectiveness have direct relationship
 - E. None of the above

10. Identify the **wrong** statement
 - A. Negative reinforcement penalizes an individual for an undesired behavior.
 - B. Negative reinforcement is the withdrawal of something unpleasant.
 - C. Social learning theory maintains that models that are different from us have the greatest influence on our behavior.
 - D. In stereotyping, observers use group characteristics to judge individuals.
 - E. None of the above
11. A person's belief about his' or her chances of successfully accomplishing a specific task refers to:
 - A. Narcissism
 - C. Self-monitoring
 - B. Risk taking
 - D. Self-efficacy
 - E. Machiavellianism
12. The stage in group development which is characterized by uncertainty is:
 - A. Forming
 - B. Storming
 - C. Norming
 - D. Performing
 - E. Adjourning
13. Which of the following is a type of informal group?
 - A. Membership group
 - C. Ad hoc committee
 - B. Task group
 - D. Task force
 - E. 'C' & 'D'
14. A phenomenon in which the norm for consensus overrides the realistic appraisal of alternative courses of action is:
 - A. Groupthink
 - B. Group shift
 - C. Interacting group
 - D. Informal group
 - E. 'C' & 'D'
15. An individual's view of how he or she is supposed to act in a given situation is:
 - A. Role identity
 - C. Role expectation
 - B. Role perception
 - D. Role conflict
 - E. None of the above
16. Which one of the following order shows needs in Maslow's hierarchy from bottom to top?
 - A. Physiological, power, growth, and esteem
 - B. Physiological, security, belonging, esteem and self-actualization
 - C. Security, belonging, mastery, psychological, and self-esteem
 - D. Security, esteem, power, and self-actualization
 - E. None of the above
17. All of the following are the assumptions of managers who believe in the "Theory X" regarding their employees **except**
 - A. Most employees consider security of job most important of all other factors
 - B. Employees like work.
 - C. Employees must be coerced, controlled or threatened to do the work.
 - D. Employees avoid responsibilities and seek formal direction.
 - E. All of the above
18. All of the following are Hygiene or Maintenance factors **except**
 - A. Increased responsibility
 - C. Company policies
 - B. Salary
 - D. Work conditions
 - E. All of the above
19. Which one of the following way (s) help(s) organizations to enhance motivation
 - A. Humanize the work environment
 - B. Publicize both short and long-term organizational goals
 - C. Use incentive programs
 - D. All of the above
 - E. None of the above
20. Which one of the following theories of motivation is categorized under process based theory of motivation?
 - A. ERG theory
 - C. Two-factor theory

- B. Equity theory D. 'A' & 'C' E. All of the above
21. If an individual is indifferent to an outcome, its valence is _____
 A. Positive B. Negative C. Zero D. Undefined E. None of the above
22. Which one of the following **is not** a feature of goal-setting theory?
 A. Specific goal fixes the needs of resources and efforts.
 B. It increases performance.
 C. Easy job result higher performance than difficult goals.
 D. Better feedback of results leads to better performances than lack of feedback.
 E. Participation of employees in goal has mixed result.
23. _____ is defined as an attempt through a formal program to integrate employee needs and wellbeing with the intention of improved productivity, greater worker involvement and higher levels of job satisfaction.
 A. Quality of work life C. Feedback
 B. Autonomy D. Hygiene factor E. None of the above
24. A type of conflict occurs when thoughts and ideas with an individual or between individuals or groups are incompatible is:
 A. Goal conflict C. Cognitive conflict
 B. Affective conflict D. Procedural conflict E. All except 'A'
25. Which one of the following is **false** about the human relations view of conflict?
 A. Conflict must be avoided C. Conflict is natural & inevitable
 B. Conflict is a positive force D. Conflict is absolutely necessary E. None
26. A conflict handling technique applied when one attempts to satisfy the other party's concerns and his/her concerns is referred to as:
 A. Smoothing B. Accommodation C. Avoidance D. Compromise E. 'A' & 'C'
27. Which one of the following **is not** a feature of a good organizational structure?
 A. Organization structure should not confuse people
 B. Organization structure should be flexible
 C. Centralization of authority D. All E. None
28. A type of organizational structure which describes relatively small and young organizations is called.
 A. Simple structure C. Matrix structure
 B. Mechanistic structure D. Organic structure E. None
29. Which one of the following can be categorized as an element of individual stressor?
 A. Lack of cohesiveness C. Rigid rules
 B. Relocation D. Ambiguous group norms E. None
30. A stress reduction strategy which can be maintained through keeping close rapport with relatives and developing friendship with fellow workers is referred to as:
 A. Plan yourself C. Time management
 B. Social support D. Yoga E. Meditation
31. Chi square distribution is used to test
 A. Independence between two variables
 B. The equality of more than two population proportion
 C. Goodness of fit test

- D. All
32. Which of the following test statistics will be used to test a hypothesis with normal population, small sample size and unknown population standard deviation?
- A. F distribution
 - B. Student's t distribution
 - C. Z distribution
 - D. Chi-square distribution
33. Which of the following test statistics will be used to test whether the mean of more than two populations means are equal or not?
- A. F distribution
 - B. Student's t distribution
 - C. Z distribution
 - D. Chi-square distribution
34. A chi square distribution test used to evaluate whether the data fits with a given set of distribution is
- A. Goodness of fit test
 - B. Test of independence
 - C. Testing the equality of more than two population proportion
 - D. All
35. Which of the following is false about the characteristics of F distribution?
- A. Sample F values range from 0 to ∞
 - B. F distribution cannot be negative.
 - C. It is discrete probability distribution
 - D. The F distribution is positively skewed
36. _____ is a type of test in which the less than sign is involved in the alternative hypothesis?
- A. Right tailed test
 - B. Left tailed test
 - C. Two tailed test
 - D. None
37. In hypothesis testing the critical value is obtained by considering the test statistics and _
- A. Population distribution
 - B. Sample size
 - C. Significance level
 - D. All
38. Which of the following is not the property of sampling distribution of the mean?
- A. The mean of the sample means is equal to the population mean
 - B. The standard error is equal to population standard deviation divided by square root of the sample size.
 - C. If the population standard deviation is unknown, sample standard deviation will be used to calculate standard error
 - D. The mean of the sample proportions is equal to the population proportion.
39. The sampling distribution of means is approximately normal for sufficiently large sample sizes ($n \geq 30$).
- A. True
 - B. False

40. A population of $N=10$ is to be sampled by using a sample size of $n=3$. How many different samples can be selected if the sampling is done so that each element of the population can be selected only once in a particular sample.
- 100
 - 120
 - 150
 - 10
41. Which of the following is false?
- The point estimator of population mean (μ) is sample mean ($\bar{X}$)
 - The point estimator of population standard deviation (σ) is sample standard deviation (s)
 - The point estimator of population proportion (P) is sample variance (s^2)
 - None
42. Z statistics will be used to make interval estimation for all of the following situations except
- Large sample size, normal population and known population standard deviation
 - Large sample size, normal population and unknown population standard deviation
 - Small sample size, normal population, and unknown population standard deviation
 - Small sample size, normal population, and known population standard deviation
43. What is a cross-sectional research design?
- A comparison of two or more variables longitudinally.
 - A design that is devised when the researcher is in a bad mood.
 - The collection of data from more than one case at one moment in time.
 - A research into one particular group of society.
44. A structured document that presents a research objectives, design of achieving these objectives, and the expected outcomes/deliverables of the study is called
- Research proposal
 - Research design
 - Research report
 - Research hypotheses
45. Your colleague is confused about using the research process, as he knows that something is wrong but is not sure of the specific causes to investigate. He seems to be having problems with _____, which is often the hardest step to take.
- Defining the problem and research objective
 - Determining a research approach
 - Developing the research plan
 - Selecting a research agency
46. Which one is called non-probability sampling?
- Systematic sampling
 - Quota sampling
 - Cluster sampling
 - Stratified random sampling
47. A complete list of all the sampling unit is:
- Sampling design
 - Population frame

B. Sampling frame D. Sample size

48. Which scale measurement has a natural zero?

A. Ratio B. Nominal C. Ordinal D. Interval

49. What is a sampling unit?

- A. The population
- B. All the individual elements of the final sample, drawn together.
- C. The basic unit containing the elements of the population to be sampled.
- D. The method used to collect the sample.

50. When one examines the entire population instead of a subgroup of the population, this is called a _____

A. Sampling B. Census C. Population D. Cluster

51. A final stage in the research process is:

- A. Problem formulation C. Data collection
- B. Data Analysis D. Report Writing

52. In data analysis, using chart is common so what type of chart is useful for showing trends or changes over time?

A. Pie Chart B. Column Chart C. Line Chart D. Histogram

53. Which quality of an entrepreneur refers to the intensive efforts made to overcome setbacks, risks, obstacles, or difficulties to achieve their goal?

- A. Goal setting
- B. Opportunity seeking
- C. Risk taking
- D. Persevering

54. Which of the following is wrong about business idea?

- A. It identifies among other things the goods/services a proposed business will sell
- B. It can be generated through brainstorming or focus group discussion
- C. A person can jump into business even without a business idea
- D. It should be short and precise indicating the most important aspects of the basic operations of a proposed business

55. All of the following are true **except**,

- A. Local artisanship serves as a source of business idea
- B. A business opportunity with an increasing demand is the one that an entrepreneur should look for
- C. The external environment poses both strength and weaknesses
- D. An entrepreneur's personal childhood experience can be a base for his future business endeavor

56. Which of the following is not a principle to follow in applying brainstorming as method of business idea generation?
- A. No criticizing or censoring of ideas
 - B. People with better experience are encouraged more than others
 - C. No interruption once the basic idea of the exercise has been introduced
 - D. No shyness and no limitations
57. Identify the incorrect statement from the following
- A. Planning is the first and the most crucial step for starting a business
 - B. A business plan is a road map for starting and running a business
 - C. Business planning is the blueprint of the step-by-step procedure that would be followed to convert a business idea into a successful business venture
 - D. Every business idea should be based on knowledge of the market and its needs
58. Which of the following is true?
- A. Small scale industries have the tendency to concentrate in big cities
 - B. Entrepreneurship does exist in a vacuum
 - C. The purpose of industry analysis is to determine what makes an industry attractive
 - D. MSEs need relatively small amount of capital
59. Identify the wrong combination
- A. Product – goods/services
 - B. Need – desires for specific satisfiers of needs
 - C. Demand – want backed by purchasing power
 - D. Value – estimate of product capacity to satisfy needs
60. Mr. Negash has purchased a car for birr 800, 000, and it will be transferred to him after a month. The utility that he enjoys of having a car after a month is,
- A. Possession utility
 - B. Time utility
 - C. Information utility
 - D. Place utility
61. Marketing answers all of the following questions except,
- A. How do I satisfy my customers as I make a profit?
 - B. Who are my customers?
 - C. How can I satisfy my customers'?
 - D. What are my customer's needs and wants?
62. It holds that consumers will favor products that are widely available and low in cost. Which of the following best describes this statement?
- A. The Production Concept
 - B. The Selling Concept
 - C. The Marketing Concept
 - D. Relationship Marketing
63. What are the two types of forces at work in Lewin's force-field?
- A. Driving forces & restraining forces
 - B. Pushing forces & pulling forces
 - C. Positive forces & negative forces
 - D. Strong forces and weak forces

64. Managing change is an integral part of _____.
 A. top management's job
 B. middle-level management's job
 C. the first-line manager's job
 D. every manager's job
65. Which of the following is not an external force of change?
 A. Marketplace
 B. government laws & regulations
 C. economic changes
 D. workforce
66. Being a manager, with no environmental uncertainty or threat of competitors' new products, would be simple without _____.
 A. government regulations
 B. diversity
 C. cultural differences
 D. organizational change
67. Changing human resource activities to attract and retain health care specialists due to increased needs for those workers is an example of what kind of environmental change factor?
 A. Marketplace
 B. Technology
 C. labor markets
 D. economic
68. Which of the following is not an internal force of change?
 A. technology
 B. strategy
 C. workforce
 D. employee attitudes
69. Which of the following forces does not drive organizational change?
 A. Social
 B. Globalization
 C. Economic
 D. All are forces that drive organizational change
70. ----- refers to the negotiation or an agreement between two groups
 A. Contracting
 B. Co-opting
 C. Pressure tactics
 D. None of these
71. Conflict is
 A. an unavoidable fact of life
 B. sometimes constructive
 C. a destructive force in relationships if continually avoided
 D. all of the above
72. Which of the following is an example of "conflict triggered by a lack of understanding and miscommunication"?
 A. ego conflict
 B. pseudo conflict
 C. relational conflict
 D. simple conflict
73. Which of the following statements about conflict is true?
 A. Conflict can always be avoided.
 B. Disagreements always signal that the relationship is on the rocks.
 C. Conflict does not always occur because of misunderstandings.
 D. Conflict is always bad.
74. Conflict is constructive when _____.
 A. there is a clear winner and a clear loser
 B. it helps to build new insights and establishes new patterns in a relationship
 C. it prevents all new conflicts
 D. both people get what they want

75. The conflict management style that is used by people with a “win-lose” philosophy is labeled ____.
- A. a competitive style
 - B. an aggressive style
 - C. a cooperative style
 - D. a confrontational style
76. You should use the forcing conflict management style when...
- A. You need to arrive at a workable solution
 - B. A creative solution is critical
 - C. Quick, decisive action is important
 - D. People need to work through their emotions surrounding the conflict
77. The first thing to do when resolving conflict with someone else is to...
- A. Assertively but diplomatically state your perspective
 - B. Brainstorm possible solutions to the problem
 - C. Slap some sense into them
 - D. Listen to their perspective
78. Which of the following is least likely to cause conflicts?
- A. Conflicting resources
 - B. Conflicting roles
 - C. Predictable policies
 - D. Conflicting perceptions
79. Which of the following is the least effective approach to conflict management?
- A. Avoidance
 - B. Facilitation
 - C. Accommodation
 - D. Cooperation
80. Which of the following statements best captures the nature of leadership as it should be for your business to ensure your continued future success?
- A. Leaders focus on budgeting, aligning people with a shared vision and solving problems
 - B. Leader focus on setting direction, align people with a shared vision and motivating people
 - C. Leaders focus on motivating people, planning and organizing and staffing
81. Leadership today is increasingly associated with the concept of _____?
- A. Control
 - B. Getting others to follow
 - C. Command
 - D. Strategy
82. Which of the following statements about leadership is false?
- A. When people operate as leaders their role is always clearly established and defined
 - B. Leadership does not necessarily take place within a hierarchical structure of an organization
 - C. Not every leader is a manager
 - D. All the above
83. All of the following are traits and characteristics of effective leaders except
- A. Charisma
 - B. Strong motivation and high energy
 - C. Trustworthiness and character
 - D. Being so self-confident they believe they can handle anything.
84. All of the following are behaviors and skills of effective leaders
- A. Practicing strong ethics.
 - B. Setting medium expectations of employees.
 - C. Asking the right questions.
 - D. All

85. What is one characteristic about the Authoritarian leadership style?
- A. Leader relies less on authority more on themselves
 - B. Leader accepts power and knowledge of the members
 - C. Leader tells others what to do
 - D. None of the above
86. What is one characteristic of a Laissez-Faire leadership style?
- A. Leader gives opinion only when asked
 - B. Leader takes charge
 - C. Everyone works together and participates together
 - D. None of the above
87. What is NOT one characteristic of the Democratic leadership style?
- A. Leader asks before doing anything
 - B. Leader enforces and relies on discipline
 - C. Leader works together with the members as a group
 - D. None of the above
88. Special type of linear programming model where by all the right hand side values of the constraint equations and parameters of the decision variables are one is
- A. Transportation model
 - B. Assignment model
 - C. Transshipment model
 - D. A and B
89. In transportation model, when the number of occupied cells is less than the number of rows plus the number of columns minus one is termed as
- A. Prohibited route
 - B. Alternate optimal solution
 - C. Degeneracy
 - D. Maximum transportation problem
90. In assignment model, the solution is optimal when
- A. The minimum number of diagonal straight lines to cover the zeros are equal to the number of rows
 - B. The minimum number of horizontal and/or vertical straight lines to cover the zeros are equal to the number of rows, but not columns
 - C. The minimum number of horizontal and/or vertical straight lines to cover the zeros are equal to the number of rows which is also equal to the number of columns
 - D. The minimum number of horizontal and/or vertical straight lines to cover the zeros are equal to the number of columns, but not rows
91. If a company wants to know the lowest cable distance required to create a network between its branches in a given country, the network model it has to use to solve the problem is
- A. Shortest route model
 - B. Minimum spanning tree model
 - C. Maximum flow model
 - D. Critical path method

92. The late finish time of a given activity will be, except
- Its early finish time, if the activity is the last activity
 - The late start time of its follower if it has only one follower
 - The smallest late start time of its followers
 - The largest late start time of its followers
93. The allowable increase in calculating range of feasibility in minimization problem will be
- The smallest positive ratio of the right hand side value to the corresponding substitution rates of the final table
 - The smallest negative ratio of the right hand side value to the corresponding substitution rates of the final table
 - The largest positive ratio of the right hand side value to the corresponding substitution rates of the final table
 - The largest negative ratio of the right hand side value to the corresponding substitution rates of the final table
94. Which of the following is true?
- Simplex approach can be used to solve problems with only two decision variables
 - Graphic approach can be used to solve any type of linear programming model
 - If the objective function and one of the constraints in the given LPM are parallel, the problem has multiple optimal solution
 - All
95. The linear programming assumption which is not directly observable from the mathematical model is
- Certainty
 - Divisibility
 - Non-negativity
 - Linearity
96. In solving linear programming model, if there is an entering variable without leaving variable, the situation is termed as
- Degeneracy
 - Unboundedness
 - Multiple optimal solution
 - Unique solution
97. A feasible solution to a Linear programming problem
- Need not satisfy all of the constraints, only some of them
 - Must be a corner point of the feasible region
 - Must satisfy all of the problem's constraints simultaneously
 - Must optimize the value of the objective function
98. The graphical method of solving Linear Programming Model is different from the simplex technique in that
- The former is more complex than the later
 - The later handles more variables than the former
 - The former handles problems with more than three variables
 - All are answers
 - None of choices are answers
99. In the simplex method when a constraint has an 'exactly equal' sign, during standardization
- Extra variables appear in the initial solution

- B. Only artificial variable is added
 - C. The coefficient of the extra variable is $-M$ for maximization problems and $+M$ for minimization problem
 - D. All are answers
 - E. None is answer
100. Identify the write combination between managerial levels and the information system that best serves that level.
- A. Middle managers – Strategic level information system
 - B. Operational managers – operational level information system
 - C. Data workers – knowledge level information system
 - D. Senior managers – management level information system
 - E. A & D
 - F. B & C
101. Which of the following is false about the functional area classification of information system?
- A. It is an outdated way
 - B. It creates functional islands of information
 - C. It requires cross functional information system
 - D. All
 - E. None
102. Which of the following is different from others?
- A. Windows XP
 - B. Microsoft Word
 - C. Adobe Photoshop
 - D. Spreadsheet programs
103. The result of Management information system produced only when pre-established “out of bounds” conditions occur is
- A. Early detection of problems
 - B. Exception reports
 - C. Ad hoc reports
 - D. All
 - E. None
104. A manager of a company faced a situations where decision are semi-structured and unstructured. Which of the following information system provides the manager the required help to perform his/her task?
- A. Transaction processing system
 - B. Management information system
 - C. Decision support system
 - D. All
105. Which of the following is a Manufacturing and Production System?

- A. Portfolio Analysis system
B. Machine control system
C. Career pathing system
D. Budgeting system
106. Almaz, a known expert in a company, transformed the data she has obtained into information by considering the purpose the data was collected. The method she used is
- A. Calculation
B. Contextualization
C. Conversation
D. Correction
E. All
107. In creating knowledge from information, a known expert in company gathers different viewpoints from different experts on the issue under discussion. The method the person used is
- A. Comparison
B. Consequence
C. Connections
D. conversation
108. Which of the following is False about Explicit knowledge?
- A. It is knowledge of rationality
B. It is sequential knowledge
C. It is analog knowledge
D. It is knowledge in the mind
E. all
109. Mr. Abebe has a special skill of developing an item. He always discuss his technical skill with his friends during tea breaks. The mode of knowledge conversion he is using is termed as
- A. socialization
B. externalization
C. internalization
D. combination
110. W/o Yिताftu has the capacity of making the best “doro wet” in Ethiopia. For the purpose of sharing her special capacity she wrote a book that shows how to make the best “doro wet”. The mode of knowledge conversion she is used is termed as
- A. socialization
B. externalization
C. internalization
D. combination
111. Ontological dimension of knowledge creation is facilitated through
- A. Combination
B. Socialization
C. Internalization
D. Externalization
E. B & C
F. A & D
112. Knowledge externalization is possible through

- A. Communication enablers
 - B. Video conferencing
 - C. Yellow pages
 - D. Digital white boards
 - E. None
113. Knowledge combination is possible through
- A. Communication enablers
 - B. Yellow pages
 - C. Forums
 - D. Data warehouse
 - E. All

114. There are two competitors in producing a certain item. One of the firm (Firm A) has a known some hidden information that will not be publicized to the general public. To win the business battle, the other firm (Firm B) always tries to dig out such hidden information. Such act of the second firm (Firm B) is
- A. Hackers
 - B. Crackers
 - C. Industrial spy
 - D. Cyber criminal
115. Which of the following is not function of human resource management?
- A. Staffing
 - B. Compensation
 - C. Equal employment opportunity
 - D. None of the above
116. Which of the following HRM activity is performed first?
- A. Job analysis
 - B. Job descriptions
 - C. Job specifications
 - D. None of the above
117. Which of the following not part of job specifications?
- A. Knowledge
 - B. Job summary
 - C. Job experience
 - D. None of the above
118. Which of the following is a widely used method of gathering data on jobs?
- A. Interview
 - B. Observation
 - C. Questionnaire
 - D. Diary
119. All of the following are importance of human resource planning, **except**:
- A. Provides mechanisms to eliminate gaps that may exist between supply and demand
 - B. To cope with future uncertainties
 - C. Deploying the right kind of personnel to the right kind of job at the right
 - D. None of the above
120. Which of the following is not purpose of job analysis?
- A. Determine training and development needs for employees
 - B. Compensate employees fairly and equitably
 - C. Helps to set a realistic performance standards
 - D. None of the above
121. All of the following are objectives of development program, **except**:
- A. To ensure better leadership behavior by improving the managers' leadership styles, communication skills, motivational skills and commitment
 - B. To help the managers prioritize and optimize the resources of the organization so as to achieve its goals effectively
 - C. To help the managers cope with the rapidly changing and complex business environment
 - D. None of the above

122. Which of the following is the correct sequence of steps in the process of training?
- A. Need assessment → Implementation → Evaluation
 - B. Need assessment → Evaluation → Implementation
 - C. Evaluation → Implementation → Need assessment
 - D. None of the above
123. Which of the following is not benefit of employee training?
- A. Improves productivity
 - B. Reduces customer complaints
 - C. Produce quality products
 - D. None of the above
124. Which of the following is not direct financial compensation?
- A. Insurance
 - B. Salary
 - C. Wage
 - D. None of the above
125. Which of the following statement is **wrong** about training and development?
- A. Training improves employees' current job performance
 - B. Development is narrower in scope than training
 - C. Training is has short-term time orientation
 - D. None of the above
126. Which of the following is concerned with generating a pool of qualified candidates in line with the human resources plan?
- A. Training
 - B. Recruitment
 - C. Development
 - D. All of the above
127. A reward based on how well a job was done is known as _____
- A. Benefits
 - B. Merit incentives
 - C. Allowance
 - D. Salary
128. Which one is the feature of benefits?
- A. Benefits are basically enjoyed by all employees
 - B. Benefit is provided based on the productivity of employees
 - C. Benefits are directly linked to performance
 - D. None of the above
129. Which of the following is an example of time-off benefit?
- A. Retirement benefit
 - B. Maternity leave
 - C. Employee service
 - D. Insurance benefit
130. Picking up suitable candidates by rejecting the unsuitable is known as _____
- A. Selection
 - B. Recruitment
 - C. Development
 - D. Training

131. Which of the following is not objective of compensation?
- A. Acquire qualified employees
 - B. Retain current employees

- D. Being ethnically centred on a global scale

161. Shift share analysis_____.

- A. Emphasizes the changes in market share over time for each member of the importing companies
- B. Emphasizes on the market trends
- C. Emphasizes on the price distribution
- D. Shifts the market drift

162. Which of the following is a government grant of certain rights given to an inventor for a limited time in exchange for the disclosure of the invention?

- A. Copyright
- B. Trade secret
- C. Patent
- D. Trademark

163. Which of the following is the most generic name to describe corporations operating around the world?

- A. TNC
- B. MNE
- C. MNC
- D. Global Corporation

164. Which of the following is the unauthorized copying and production of a product?

- A. Patent
- B. Trade secret
- C. Counterfeiting
- D. Copyrights

165. Which of the following forms of law was derived from English law?

- A. Code law
- B. Common law
- C. Religious law
- D. Civil law

166. Select the one which is not an example of discrete variable (data);

- A. The number of cars sold on franchise.
- B. The number of students in a class.
- C. The weight of new born babies.
- D. Family size

167. Consider the following probability distribution.

xi	0	1	2	3	4	5	6
P(xi)	0.07	0.19	0.23	0.17	0.16	0.14	0.04

Which of the following is false?

- A. $P(x > 3) = 0.34$
- B. $P(2 \leq x \leq 5) = 0.33$
- C. $P(x \geq 3) = 0.51$
- D. $P(x < 6) = 0.96$

168. Which of the following data sets has no mode?

- A. {4, 7, 7, 9, 10}
- B. {2, 2, 3, 3, 4, 4}
- C. {1, 1, 2, 3, 4, 4}
- D. {2, 2, 4, 5, 7, 8}

169. The mean and the variance are always equal in which of the following distribution?

- A. Binomial distribution
- B. Poisson distribution
- C. Hypergeometric distribution
- D. All

170. Which of the following data sets has a median of 7.5?

- A. {6, 7, 8, 9, 10}
- B. {7, 3, 5, 8, 14, 10 }
- C. {1, 3, 7, 10, 14}
- D. {2, 7, 9, 11, 14, 17}

171. Identify the false statement by consider each of the following three sets:

Set I: {5, 5, 5, 5}, Set II: {4, 4, 6, 6} and Set III {3, 3, 7, 7}.

- A. The mean of the three sets are 5.
- B. The mode of the three sets are 5.
- C. The mean of the three sets are 5.
- D. The standard deviations of set I, II and III are 0, 1, and 2 respectively.

172. The mean age of six persons is 46 years. The age of these six persons are 57, 39, 44, 51, and 37 years respectively. The age of the sixth person is _____ year.

- A. 38
- B. 45.6
- C. 48
- D. 55.2

173. An incomplete relative frequency distribution is given below

Item	A	B	C	D
Relative frequency		0.18	0.4	0.2

If the total sample size is 200, what is the frequency of item A?

- A. 44
- B. 36
- C. 80
- D. 40

174. What is the outcome of playing a football game?

- A. Playing a football game
- B. Not losing, not wining
- C. Either win, lose or tie
- D. A and B

175. The measures of dispersion can never be :

- A. Posetive
- B. Negative
- C. Zero
- D. Equal to one
