

5. "In this year, the university registered 1000 regular students and the university provides 700 birr pocket money for each student per month. From this we may conclude that, the university has been spending 700,000birr per month for students' pocket money." This argument is:
- weak inductive argument
 - Valid deductive argument
 - Invalid deductive argument
 - strong inductive argument
6. 'Russia has promising economy, nuclear energy, and known for its dictator leadership. USA like Russia has promising economy and nuclear energy. Therefore, USA probably also known for its dictator leadership.' This argument is:
- Argument based on statistics
 - Argument based on casual inferences
 - Argument based on analogy
 - Argument based on definition
7. Which one of the following is an argumentative passage?
- 'All USA presidents are born in England. Emmanuel Macron is a USA president. It follows that; Emmanuel Macron is born in England.'
 - 'Ethiopian Broadcasting Cooperation (EBC) television announces that the ministry of education shows progress.'
 - 'If you insert litmus paper to acid, then its color will be changed to red.'
 - 'Ethiopia has a wealth of culture. Look the wedding ceremony, and gorgeous celebrations of religious festivals.'
8. **Read the following argument!**
'Last year, an international NGO working on youth's behavior collected data from eight hundred regular students from different private colleges in Adama town. The result revealed that five hundred students have been practicing cannabis. Thus, it is reasonable to conclude that, more than seventy percent of regular students from different private colleges in Adama town are practicing cannabis.' Which one of the following is true about the argument stated above?
- strong inductive argument
 - valid deductive argument
 - Weak inductive argument
 - Invalid deductive argument
9. Which one of the following is true about the relationship between validity and soundness of deductive arguments?
- If an argument is unsound, then it will be necessarily invalid.
 - If an argument is sound, then it will be necessarily valid.
 - If an argument is valid, then it will be necessarily sound.
 - If an argument is unsound, then it will be necessarily valid.
