🚩 Flag question

What is the primary objective of the Facade design pattern in software architecture?

- ☐ a. To encapsulate a request as an object, thereby allowing for parameterization of clients with queues, requests, and operations.
- ☐ b. To define a one-to-many dependency between objects, ensuring that changes in one object automatically trigger updates in others.
- ☐ c. To ensure that only one instance of a class is created and provide a global point of access to it.
- ☐ d. To provide a unified interface to a set of interfaces in a subsystem, simplifying complex system interactions.
