

Question 96
Not yet answered
Marked out of 1.00
Flag question

Given the following cash flow information for groups of projects, answer the questions that follow. Assume cash flows take place at the end of each year. The year 0 figure represents the initial investment made at the start of the project. (Answer questions 98 to 100 based on this data).

Year	Project1	Project2	Project3
0	-10,000	-100,000	-12,000
1	1,000	20,000	3,000
2	1,000	20,000	3,000
3	1,000	20,000	3,000
4	1,000	20,000	3,000
5	10,000	30,000	7,500

Which project is the most viable, if you use Net Profit as a cost-benefit analysis technique?

- ☐ a. Project 1, with a net profit of 4000.00
- ☐ b. None
- ☐ c. Project 2 with a net profit of 10,000.00
- ☐ d. Project 3, with a net profit of 7500.00
